

5.1.1	Base-Plate	29
5.1.2	Front-Plate	31
5.1.3	Wheels	32
5.1.4	Software Assembly	33
5.2	Physical Assembly	34
5.3	Final Design	36
6	Remote Control	39
6.1	Brief	39
6.2	System design	39
6.2.1	High level decomposition	39
6.2.2	Further decomposition into submodules	40
6.2.3	Finalising initial design + interface technology	41
6.3	Implementation & Results: Interface	44
6.3.1	Print logs	44
6.3.2	Output live sensor data	47
6.3.3	Updating the interface	48
6.3.4	Overall results for this part of the implementation	49
6.4	Implementation & Results: Connection manager	50
6.4.1	Connecting to the microcontroller	50
6.4.2	Sending GET requests to the microcontroller	51
6.4.3	Polling the microcontroller	55
6.4.4	Overall results for this part of the implementation	57
6.5	Implementation & Results: Microcontroller	57
6.5.1	Callbacks	58
6.5.2	Rover movement	58
6.5.3	Returning sensor data	60
6.5.4	Overall results for this part of the implementation	61
7	Submodule integration	62
7.1	Brief	62
7.2	Age	62
7.3	Name	62
7.4	Magnetic polarity	63
A	Appendix	64
A.1	MATLAB Code	65
A.2	Name Arduino Code	67
A.3	Magnetometer Code	68
A.4	Names of UI controls	70
A.5	Enums in the remote control	72
A.6	Gantt Chart	73
